  - Voditelj IRB tima koji je predložio struktturni projekt O-ZIP (otkako je ravnatelj IRB-a više nije zadužen za koordinaciju O-ZIP-a). Taj 60 milijuna eura vrijedan projekt je najveći struktturni projekt pri MZO-u, i financiran je kroz Operativni program za konkurentnost i koheziju 2014-2020. Fokus će biti na napredne tehnologije i materijale, zaštite okoliša i morskih znanosti, biotehnologije i ICT-a.
  - Koordinator 1.320,000 Eura vrijednog FP7 projekta: "Upgraded Facility for Development of Silicon and Diamond Particle Detector Systems" - Particle Detectors, (8/10-8/13) (web: <http://lnr.irb.hr/pd> ).
  - Koautor (u suradnji s koordinatorom N. Soićem, te s S. Fazinićem) i voditelj radnog paketa 2.700.000 Eura vrijednog Horizon 2020-WIDESPREAD-2014-2 ERA Chair projekta: "Expanding Potential in Particle and Radiation Detectors, Sensors and Electronics in Croatia"- PaRaDeSEC, 06/2015.
  - Član Marie Skłodowska Curie savjetodavne grupe za Horizon 2020.
  - Službeni predstavnik Vlade Republike Hrvatske u ESFRI (“European Strategy Forum on Research Infrastructures”).
  - Član odbora za fizikalne znanosti i inžinjerstvo u ESFRI.

- Imenovan od strane Ministarstva znanosti, obrazovanja i sporta Republike Hrvatske za voditelja Strateškog odbora za istraživačku infrastrukturu.
  - Imenovan od strane Ministarstva znanosti, obrazovanja i sporta Republike Hrvatske za predsjednika povjerenstva za povećanje stope uspjeha Hrvatske u FP7 i vezanim EU programa (2012- 2013)
  - Imenovan od strane Ministarstva znanosti, obrazovanja Republike Hrvatske i sporta kao jedan od dva stručnjaka za “FP7 Cooperation – Energy” odbor (3/11 - 13)
  - Vanjski stručnjak za brojne FP7 seminare
- 
- **Ravnatelj IRB-a**, najvećeg istraživačkog instituta u Hrvatskoj u fundamentalnim znanostima (fizika/kemija/biologija/medicina/okoliš i more/ICT, 320 trajno znanstvenog osoblja, 850 zaposlenih):
    - Uspostavio puno jači naglasak na znatno bolju suradnju s industrijom, unutar i izvan Hrvatske. Uveo načelo da su patenti i industrijska suradnja važan kriterij za napredovanje. Promijenio pravilnik IRB intelektualnog vlasništva radi maksimalne stimuliracije znanstvenika za podnošenje patentnih prijava i za suradnju s gospodarstvom.
    - Reorganizirao IRB operacije tako da kapitalna oprema postaje, za razliku od uobičajene prakse, dostupna znanstvenicima izvan laboratorija i izvan IRB-a.
    - Uveo fiskalno odgovorno ponašanje, eliminirajući brojne nepotrebne velike izvore rashoda, te naglašavajući važnost stjecanja novih izvora prihoda. Smanjio rashode za 50%.
    - Stavljen prioritet na aktivnosti kao što su podnošenje FP7 projekta. Uvedene nagrade za najbolje prijavljene međunarodne projekte. Uspješnost FP7 projekata porasla je za 500%, a IRB je povećao svoj udio HrZZ projekta iz prirodnih znanosti na 50%.
    - Uspostavio brojne procedure i podzakonske akte radi osiguranja nesmetanog funkciranja svih razina IRB uprave te radi uklanjanja brojnih izvora sukoba. Uveo ograničenje broja mandata i broja paralelnih funkcija za sve ključne pozicije, te uspostavio automatsko uključivanje na ključne položaje znanstvenike koji dobiju FP7 i komercijalne projekte. Uspostavio princip da je postdoktorski rad izvan Hrvatske nužan za dobivanje znanstveno radon mjesto na IRB-u.
    - Naglasak na strane znanstvenike, i na privlačenje znanstvenika povratnika. Povećan broj stranih znanstvenika za više od tri puta.

- Uspostavljen naglasak na strukturne fondove. IRB-u je kao rezultat toga odobren od strane Operativnog programa 2014-2020 projekt O-ZIP - 60 milijuna eura vrijedan strukturni projekt, najveći strukturni projekt pri MZOS-u.
- Naglasak na diseminaciju znanosti, te na IRB znanstvene i industrijske aktivnosti.
