

CONTACT INFORMATION	Laboratory for Machine Learning and Knowledge Representation Ruđer Bošković Institute Bijenička cesta 54 10 000 Zagreb, Croatia	<i>Mobile:</i> +385 99 214 2973 <i>Office:</i> +385 1 456 1091 <i>E-mail:</i> tlipic@irb.hr
CURRENT POSITION	Research Associate at Ruđer Bošković Institute, Croatia, 11/2017 – present	
RESEARCH INTERESTS	<ul style="list-style-type: none"> • interpretable and scalable machine learning and deep learning • data science and big data methodologies and applications • computational sciences: social science, neuroscience and medicine • complex networks, agent based modeling and simulation • human behavior modeling, socio-technical systems, smart cities • cloud and ubiquitous computing, human-driven computing and affective computing • self-aware, self-adaptive and self-organizing systems 	
RESEARCH EXPERIENCE	<p>Research Assistant at Ruđer Bošković Institute, Croatia, 02/2010 – 11/2017 Scientific, research and development activities in diverse topic areas focused around visual analysis, distributed computing, big data analysis and data science in general. Actively participating in different national, bilateral and international industry and scientific projects. Preparing project proposals for international (FP7 and Horizon 2020) and national project initiatives.</p> <p>Visiting research scholar at Center for Polymer Studies, Department of Physics, Boston University, United States, 09/2014 - 09/2015 Collaboration with Professor H. Eugene Stanley. Worked on modeling and analysis of complex networks vulnerabilities to failures and attacks, with application to socio-technical and socio-economic systems. Results published in two top-tier multidisciplinary journals.</p>	
EDUCATION	<p><u>University of Zagreb, Faculty of Electrical Engineering and Computing, Croatia</u></p> <p>PhD in Computer Science (February 2010 – March 2017) Thesis: <i>Vulnerability of dynamic complex networks with local dependencies and recovery process</i>, scientific contributions published in top journals and conference proceedings, developed modular simulation framework for dynamic complex networks analysis on distributed computing environment</p> <ul style="list-style-type: none"> • Extended theory and concepts in the field of complex networks, with specific focus on modeling and evaluating vulnerabilities of dynamic complex networks with local-dependencies and active recovery process to cascade failures caused by continuous ongoing time-dependent attacks and by consequences of initiating an attack on a competing network. • Application of the complex network framework to the theory-based data analysis of stability in emerging large scale socio-technical and socio-economic systems. <p>MSc in Computer Science (October 2004 – September 2009) Thesis: <i>Widget-based Environment For Textual Web Content Translation</i> Awarded with State scholarship for gifted students. Prize awarded solutions in three research and development challenges related to visual analytics and future emerging Web technologies. Internship at Ericsson Nikola Tesla summer camp. Worked as a demonstrator.</p>	

RESEARCH
PROJECTSRuder Bošković Institute, Zagreb Croatia

Scalable Big Data Bioinformatics Analysis in the Cloud bilateral project with Medical University of Innsbruck, Austria funded by Ministry of Science, Education and Sports, Croatia (January 2014 - December 2015), prepared the project proposal and worked on the deployment of Big Data analysis stacks and workflows on Clouds.

SCI-BUS: Scientific gateway Based User Support funded by Seventh Framework Programme (FP7), European Commission (October 2012 - October 2015), extended functionally of WSPGRADE gUSE framework for running job workflows on Sun Grid Engine-based computing environments and established application-specific end-user gateway (AdriaScience) on Croatian national cluster and Grid computing infrastructure.

Optimization of energy consumption in distributed computing systems bilateral project with Jozef Stefan Institute, Ljubljana, Slovenia funded by Ministry of Science, Education and Sports, Croatia (January 2012 - December 2013), prepared project proposal and worked in two research directions: (1) the evaluation parallel and distributed applications energy consumption on different computational environments for defining execution-energy policies and (2) consolidation and auto-scaling computational resources in Cloud environment according to application specific needs.

Methods of Scientific Visualization funded by Ministry of Science, Education and Sports, Croatia (*September 2007 - December 2013*), worked on visual analysis and biomedical 3D imaging/thermography.

4D TG: 4D Thermography System for Non-invasive diagnostics funded by Business Innovation Center of Croatia (February 2011 - September 2011), prepared project proposal, co-led design and development of software (control, calibration, visualization) for multi-resolution 3D thermal imaging system consisted of high-resolution offline 3D scanner and a real-time low-resolution 3D scanner (depth camera – Microsoft Kinect), both of them paired together with a thermal imaging camera.

EmbAssi: Reconfigurable embedded systems based assistive applications for elderly people bilateral project with Budapest University of Technology and Economics, Hungary funded by Ministry of Science, Education and Sports, Croatia (September 2009 - September 2011), worked in the fields of ambient intelligence and biomedical monitoring with focus on elderly assisted living applications.

TEACHING

University of Zagreb, Faculty of Science, Department of Mathematics, Croatia

As a **teaching assistant** prepared and held lectures and laboratory sessions, prepared and graded exams, held office hours for the **Machine learning** (summer 2011/2012, 2012/2013, 2013/2014, 2017/2018) and **Artificial intelligence** (winter semester 2011/2012) courses.

College of Business and Management “Baltazar Adam Krčelić”, Croatia

Prepared and held lectures on augmented reality and applications based on 3D graphics, and mentoring student final projects for **Multimedia Communications** (summer 2010/2011, 2011/2012, 2012/2013, 2013/2014) course.

University of Zagreb, Faculty of Electrical Engineering and Computing, Croatia

As a demonstrator held laboratory sessions, graded exams and final projects for **Programming language translation** (winter 2007/2008, 2008/2009) and **Introduction to theoretical computer science** (summer 2007/2008, 2008/2009) courses.

PROFESSIONAL
TRAININGSummer schools and workshops

BIOTS 2018 – Blockchain & IoT School, ETH Zurich, Switzerland (12-16th February, 2018)

CryptoDatathon, ETH Zurich, Switzerland (4-9th June, 2018)

First International Summer School on Data Science, Split, Croatia, Center of Research Excellence for Data Science and Advanced Cooperative Systems (26-30th September, 2016)

Third European Ph.D. School on Mathematical Modelling of Complex Systems, Technological Educational Institute of Crete, Heraklion, Greece (13th - 28th July, 2013)

WS-PGRADE/gUSE Code Camp, the Computer and Automation Research Institute, Hungarian Academy of Sciences, Budapest, Hungary (28th - 30th November, 2012), hands-on introduction to the latest developments in Grid/Cloud computing and scientific gateway technologies.

Internships

Ericsson Summer Camp funded by Ericsson Nikola Tesla, Zagreb, Croatia (June 2008 – August 2008), worked on an automatic translation of TTCN-2 test suites to C code. Technical report: T. Lipic and B. Drazic: *TTCN-2 to C translator*, Ericsson Nikola Tesla & Faculty of Electrical Engineering and Computing, Zagreb, Croatia, 2008

ORGANIZING &
LECTURING
ACTIVITIES

Brainhack Zagreb 2018, Zagreb, Croatia (5-6th May, 2018)

NESUS Winter School and PhD Symposium on Heterogeneous Computing and Data Science, Zagreb, Croatia, COST Action NESUS (22-25th January, 2018)

Second International Summer School on Data Science, Split, Croatia, Center of Research Excellence for Data Science and Advanced Cooperative Systems (25-29th September, 2017)

AWARDS

- 2015 Annual award for scientific excellence, Ruđer Bošković Institute.
- 2011 Best poster award, event *Scientific Encounters of the Third Kind*, Ruđer Bošković Institute. Poster title: *3D Thermography and Medical Applications*.
- 2010 Member of a team awarded the VIDI e-Innovation Award *Golden Tesla's Egg*
- 2008 Member of a team awarded the Migrant Boat Mini Challenge Award: Simple and Effective Integrated Display award in IEEE VAST 2008 Challenge
- 2008 Member of a team awarded the 3rd Prize in e-business project contest awarded by Agrokor, leading Croatian food and retail conglomerate
- 2008 Member of a team awarded the 1st award in Silverlight Web Start Contest organized by student organization e-Student sponsored by Microsoft
- 2004 - 2009 State student scholarship for gifted students

**TECHNICAL
SKILLS**

Very good knowledge and work experience with:

- **Programming Languages:** Java, Python, C#, C++/C, Scala and Julia
- **Mathematical and statistical computing:** Python, R (R studio), Matlab
- **Data processing and analysis frameworks and platforms:** pytorch, tensorflow, caffe, RapidMiner, Weka, Hadoop, Spark, Flink, Storm
- **Agent-based modeling:** Mason/DMason and GAMA
- **Network analysis:** GraphStream/SNAP, graph-tool/igraph/NetworkX, Gephi/Cytoscape
- **Behavioral research:** oTree, nodeGame, jsPsych, Breadboard
- **Databases technologies:** Microsoft SQL Server (ADO.NET, Entity Framework), PostgreSQL, MySQL, MongoDB, HBase, Neo4j, Redis, HDF5 and SciDB
- **Web development (Internet and Web technologies):** ASP.NET, Java EE (Servlet, JSP, JSF), Django, PHP, JavaScript, AJAX, REST, Comet, HTML5, CSS3
- **Other:** Repositories (Git, SVN), TeX, Microsoft Office, OmniGraffle, Inkscape

**ORGANIZATIONAL
& SOCIAL
SKILLS**

Perennial teamwork experience
 Project leadership experience on several research and development projects
 Communicative, easily approachable
 Willing to learn and teach and share knowledge
