SUMMARY

- **Ph.D. in Chemistry**, subdiscipline – Organic chemistry
- **Master in Food Science and Biotechnology** (Mag. ing. biotech.), subdiscipline – Biochemical engineering (biotechnological processes in the pharmaceutical and food industry) as well as rich practical work experience
- **secondary vocational education** (field: Pharmacy technician)
- **more than 15 years of experience in scientific work at research institutes** (Croatia, Poland); **1.5 years of experience working abroad in an international environment**
- **experience of working in an industrial environment** (field: Dairy industry)
- **experience of working in a pharmacy**
- **strong “hands-on” experience in design, synthesis, and *in vitro* biological screening of potential biologically active compounds** (antitumor, antibacterial and antiviral research, and drug development) as well as **in spectroscopic studies of small organic molecules in solution** (practical experience in instrumental methods of chemical analysis)
- **20 scientific publications, 2 professional publications**, several in preparation, active participation in national and international scientific projects and conferences (experience in setting up research projects, building collaborations with external scientific partners)
- experience as a teaching assistant and mentor of a student’s praxis
- active service to the scientific community (promotion and popularization of science)
- fluent in Croatian and English; knowledge of German
- enthusiastic, motivated, and diligent; excellent experimental, analytical and organizational skills; good communication skills and team spirit with great working experience in research teams to solve problems and achieve end results

**WORK
EXPERIENCE**

07/2019 – *Research Associate*
Ruđer Bošković Institute, Zagreb, CROATIA

Division of Organic Chemistry and Biochemistry
Laboratory for Biomolecular Interactions and Spectroscopy

Research Associate with the main focus on:

Working on the project entitled „Višekromoforne probe za prepoznavanje pojedinih struktura DNA, RNA i proteina“ (BioMultiChromoProbes)

02/2019 – 05/2019

Senior Research Assistant – Postdoc
Postdoctoral scientific specialization in Croatia
Ruđer Bošković Institute, Zagreb, CROATIA

Division of Physical Chemistry
Laboratory for Green Synthesis

Senior research scientist with the main focus on:

Working on the project entitled „Mehanokemijska reaktivnost pod kontroliranim uvjetima temperature i atmosfere za čistu sintezu funkcionalnih materijala (MECHANOCNTROL)“

05/2018 – 09/2018

Senior Research Assistant – Postdoc
Postdoctoral scientific specialization in Croatia
Ruđer Bošković Institute, Zagreb, CROATIA

Division of Organic Chemistry and Biochemistry
Laboratory for Biomolecular Interactions and Spectroscopy

Senior research scientist with the main focus on:

The continuation of the project „Multifunctional molecular sensing of DNA/RNA secondary structure by chemical sensors“ with the emphasis on:

- screening and selection/sorting of fluorophore-tagged bio-molecules from the previously prepared library and performing the additional spectroscopic sensing experiments to get insight into selectivity (isothermal titration calorimetry (ITC), differential scanning calorimetry (DSC))

11/2016 – 05/2018

Senior Research Assistant – Postdoctoral Research Fellow
Postdoctoral study abroad
Institute of Medical Biology, Lodz, POLAND

Laboratory of Molecular Virology and Biological Chemistry
Polish Academy of Sciences

Senior research scientist with the main focus on:

Working on the project entitled „Oligo-Derivative Composites of Nucleic Acids and Boron Clusters – a New Material for Bionanotechnology“

- design, synthesis, and full characterization of boron cluster – nucleobase/nucleoside conjugates;
- investigation of the prospective applications of new entities (phosphorylation potential – radiolabelling with P-32 and H-3; supramolecular chemistry and potential to form nano - constructions – R&D of new nanomaterials, electrochemical genosensors, etc.);
- biological experiments *in vitro* with different virus cell lines (cell cultivation, preliminary biological screening of synthesized compounds, data analysis, and report – structure/activity relationship discussion)

12/2013 – 11/2016

Senior Research Assistant – Postdoc
Postdoctoral scientific training in Croatia
Ruđer Bošković Institute, Zagreb, CROATIA

Division of Organic Chemistry and Biochemistry
 Laboratory for Biomolecular Interactions and Spectroscopy
 (previously Laboratory for Supramolecular and Nucleoside Chemistry)

Senior research scientist with the main focus on:

- A. Working on the project entitled „Multifunctional molecular sensing of DNA/RNA secondary structure by chemical sensors“
 - design, synthesis, and full characterization of fluorophore-tagged bio-molecules and their applications as multifunctional small molecular sensors for various DNA/RNA oligonucleotides (R&D of new dyes in molecular diagnostic assays)
 - investigation of anticancer activity - biological experiments *in vitro* with different cancer cell lines - carcinoma, leukemia, and lymphoma cell lines (cell cultivation, preliminary biological screening of synthesized compounds, data analysis, and report – structure/activity relationship discussion)
- B. Working on the project entitled „Purine salvage pathway enzymes from *Helicobacter pylori* and *Escherichia coli*“
 - design and synthesis of new purine nucleoside phosphorylase inhibitors (PNP inhibitors) based on molecular modeling (docking) experiments (R&D of next-generation pharmaceuticals for the treatment of autoimmune diseases)

04/2008 – 11/2013

Research Assistant
Ph.D. Graduate Student, Assistant
Ruđer Bošković Institute, Zagreb, CROATIA

Division of Organic Chemistry and Biochemistry
 Laboratory for Supramolecular and Nucleoside Chemistry

Junior research scientist – Ph.D. graduate student with the main focus on:

Working on the project entitled „Synthesis of novel biologically active nucleobase and nucleotide derivatives“

- design, synthesis, and full characterization of nucleobase/nucleoside purine/pyrimidine derivatives (development, optimization, and implementation of contemporary synthetic methodologies as well as application of well-established synthetic methods for the preparation of new series of compounds);
- investigation of anticancer activity - biological experiments *in vitro* with different cancer cell lines - carcinoma, leukemia, and lymphoma cell lines (cell cultivation, preliminary biological screening of synthesized compounds, data analysis, and report – structure/activity relationship (SAR) discussion)

07/2006

Professional practice at the end of undergraduate studies (field: Dairy industry)
LURA GRUPA d.d., the majority owner of the Dukat industry
Ulica grada Vukovara 271, Zagreb, CROATIA

- evaluation of microbiological quality and safety of milk and dairy products (work under strictly sterile conditions)
- analysis of organoleptic properties of dairy products
- application of analytical methods to determine the content and the share of fat and protein in selected products
- getting acquainted with the operation of the plant in the dairy industry

- 06/2001 – 08/2001** **Professional practice at the end of vocational secondary education (field: Pharmacy)**
Pharmacy Baričević
Josipa Marića 1, Hrvatska Kostajnica, CROATIA
- everyday working with patients
 - manufacture of magistral and galenic pharmaceutical formulations (ointments, creams, solutions, suspensions, elixirs, waters, etc.)
 - issuance of medicines according to medical prescriptions and patient counseling
 - follow-up work in pharmacy and intensive communication with suppliers

EDUCATION AND TRAINING

11/2016 – 05/2018 **Postdoctoral study**
Institute of Medical Biology, Lodz, POLAND

Laboratory of Molecular Virology and Biological Chemistry
 Polish Academy of Sciences

11/2013 – 11/2016 **Postdoctoral scientific training**
Ruđer Bošković Institute, Zagreb, CROATIA

Division of Organic Chemistry and Biochemistry
 Laboratory for Biomolecular Interactions and Spectroscopy

05/2008 – 11/2013 **Ph.D. Graduate Study (subdiscipline: Organic chemistry)**
Faculty of Science
University of Zagreb, Zagreb, CROATIA

THESIS TITLE "Novel 1,4-Disubstituted 1,2,3-Triazole Derivatives of the Purine and Pyrimidine Series: Synthesis and Biological Evaluation"
 Supervisor: Dr. Biserka Žinić, Senior Scientist, Full Prof.
 (defended on November 29, 2013)

ACADEMIC DEGREE Doctor of Philosophy in Chemistry (Ph.D.)

09/2002 – 11/2007 **Undergraduate Study (subdiscipline: Biochemical engineering)**
Faculty of Food Technology and Biotechnology
University of Zagreb, Zagreb, CROATIA

THESIS TITLE "Quaternary Salts of Pyridoxal Oxime"
 Research Advisor: Prof. Dr. Jasna Vorkapić-Furač, Full Prof.
 (defended on November 05, 2007)

ACADEMIC DEGREE Master of biotechnology (Mag. ing. biotech.)

09/1998 – 05/2002 **The Zagreb Health School (field: Pharmacy technician)**
Secondary vocational education, Zagreb, CROATIA

TITLE Pharmacy technician

CLASSES

(GRADUATE,
 UNDERGRADUATE,
 POSTGRADUATE
 / DOCTORAL STUDY)

SEPTEMBER 2015 **Lecturer** - within the Module "Preparation, Analysis and Application of Oligonucleotides", Lecture Topic: "Preparation, analysis, and application of oligonucleotides", International Ph.D. Study in Medicinal Chemistry, University of Rijeka, Rijeka, Croatia

January 2012, October 2013

Invited Lecturer - within the Course "Instrumental Measurement Techniques and Physical Methods in Biomedical Analytics", Lecture Topic: "Refractometry and Polarimetry", Department of Medicinal Chemistry, Biochemistry and Clinical Chemistry, Faculty of Medicine, University Undergraduate Study in Biomedical Laboratory Technologies, Josip Juraj Strossmayer University of Osijek, Osijek, Croatia

July 2013

Mentor of the undergraduate student's Praxis in the Group of Prof. Dr. B. Žinić, Ruđer Bošković Institute
Main Investigator: Ana-Maria Županić, Faculty of Chemical Engineering and Technology, University of Zagreb, Zagreb, Croatia

October 2004 – January 2005

Teaching Assistant within the Course "General Microbiology", Laboratory for General Microbiology and Food Microbiology, Department of Biochemical Engineering, Faculty of Food Technology and Biotechnology, University of Zagreb, Zagreb, Croatia

MAIN TOPICS OF RESEARCH WORK / EXPERTISE

Organic synthesis

- expertise in heterocyclic chemistry, especially in nucleobase/nucleoside, carbohydrate, peptide, and organometallic chemistry, boron clusters chemistry - extensive experience in design and synthesis of new classes of compounds by using classical methods of synthesis and modern "green chemistry" approaches (microwave-assisted synthesis, solid phase synthesis – mechanochemical synthesis, etc.)
- experience in the synthesis of biological conjugates of DNA aptamers and peptides using the most modern methods of click chemistry

Complete characterization and studies of organic compounds

(practical experience in instrumental techniques)

- development, validation, and transfer of analytical methods (expertise in using preparative and column chromatography as well as semi-/preparative high-performance liquid chromatography (HPLC))
- rich experience of assignment of 1D (¹H, APT, ¹³C) and 2D (Cosy, Noesy) NMR spectra
- experience in the application of various high-resolution mass spectrometry techniques (ESI-HRMS, MALDI-HRMS, FAB-HRMS)
- experience in the application of infrared spectroscopy (FTIR) as well as
- UV-Vis and fluorescent spectroscopy and other spectroscopic (CD/LD) and calorimetry (ITC, DSC) techniques used in quantitative studies of a wide variety of biomolecular interactions in solution
- experience in applying biochemical techniques of visualization and monitoring of chemical transformations (SDS-PAGE electrophoresis)

Medicinal chemistry

- biological screening of potential biologically active compounds *in vitro* (antitumor, antibacterial and antiviral research) – an experience of working under sterile conditions
- analysis of final results and report preparations → structure – activity relationship (SAR) discussion
